## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's amendment and remarks filed December 7, 2007, are noted with appreciation.
2. Claims 1-31 remain pending.

### ***Response to Arguments***

3. Applicant's arguments filed December 7, 2007, have been fully considered but they are not persuasive.

A. The Examiner notes that Applicant provides no explicit definition of the precise nature and extent of the attraction exhibited by the claimed "attraction material." Further, the Examiner notes that the claims do not require that the attraction material "attracts CNTs out of solution at specific locations on the device substrate." Rather, the claims merely require deposition of an attraction material, wetting of the attraction material with CNT-containing solution, and *adhesion* of the CNTs to the attraction material. Bower teaches a material that, at some point after contact with a CNT-containing solution, anchors or retains CNTs. It is the Examiner's position that such an anchoring or retaining is a form of attraction not expressly excluded from the claim by either the language of the claim or the definition of the claim terminology presented in the specification. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

B. Applicant's assertions in item 2, starting at page 13 of the remarks, are mere conjecture and are unsupported by any evidence of record.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. **Claims 1-7, 10-18, and 21-31, are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al. in view of Bower et al.**

A. These claims remain rejected as set forth under this heading in the prior Office action and as explained above.

***Allowable Subject Matter***

7. Claims 8, 9, 19, and 20, are allowed.

8. The following is an examiner's statement of reasons for allowance: These claims are allowable for the reasons set forth under this heading in the prior Office action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

10. The prompt development of clear issues in the prosecution history requires that applicant's reply to this Office action be fully responsive (MPEP § 714.02). When filing an amendment, applicant should specifically point out the support for any amendment made to the disclosure, including new or amended claims (MPEP §§ 714.02 & 2163). A fully responsive reply to this Office action, if it includes new or amended claims, must

therefore include an explicit citation (i.e., page number and line number) of that/those portion(s) of the original disclosure which applicant contends support(s) the new or amended limitation(s).
